SUMMARY

Software Developer with over 3 years of experience in full-stack web development. Experienced in building and maintaining web applications, with contributions to enterprise projects in government and corporate sectors. Proficient in PHP, Laravel, and modern frontend frameworks, with a focus on database optimization, UI/UX development, and collaborative team environments.

EXPERIENCE

PHP Developer

DBT Technologies Sdn Bhd

April 2025 – Present

- Developed the DBKL E-Perolehan Post-Award workflow engine, converting local government procurement compliance guidelines into scalable database schemas and backend logic.
- Developed a dynamic Gantt Chart module to manage changing project timelines, handling real-time state updates for EOTs, milestone claims, and automated "Sick Project" triggers.
- Collaborated with Business Analysts to bridge requirement gaps, advising on technical feasibility and offering database/workflow recommendations before development.
- Seamlessly integrated new Post-Award modules with existing core procurement infrastructure, minimizing technical debt and ensuring backward compatibility with legacy system data.

Fullstack Software Developer

Two Q Alliance Sdn Bhd

June 2024 – April 2025

- Transformed UI into functional working code.
- Developed and maintain Majlis Perbandaran Ampang Jaya Intelligent Community (MPAJ-ICOMM).
- Maintained and provided ongoing support for Malaysian Palm Oil Board (MPOB) e-Kilang.
- Provided hands-on mentorship to junior developers, MPAJ staff and interns, helping them adapt to the system and following coding standards which improved overall team efficiency.

Software Engineer (Contract)

Possimo Technologies Sdn Bhd

July 2023 – May 2024

- Acquired and applied proficiency in emerging programming skills such as TypeScript, NextJS, MaterialUI, Postman and Git.
- Transformed Software, Business Requirement Specifications and User Interface (UI) designs into functional code and software, demonstrating adaptability and contributing to diverse projects.
- Engaged in direct communication with clients to tailor solutions, ensuring alignment with specific requirements and fostering effective client relationships.
- Collaborated closely with backend engineers to seamlessly integrate APIs, enhancing the overall efficiency and functionality of software solutions.

Front End Web Developer Intern
Bateriku Sdn Bhd

November 2022 - February 2023

- Developed, tested and maintained Bateriku.com website using WordPress Elementor.
- Developed Front-end view of BattMen dashboard used to collect customers data to conduct Road Side Assistance (RSA) using HTML, CSS, Bootstrap and JavaScript.
- Collaborated with teammate to implement a mobile view update for the existing system to enhance the system's user experience on smartphones and tablets.
